

Offer your Care to the Deprived

Medical Equipment Donation Scheme 2015-16 (for Community Services)

Dear Friends,

Tung Wah Group of Hospitals (TWGHs) has been serving the Hong Kong community for 145 years. Through the years, TWGHs adheres to our mission of “healing the sick and relieving the distressed; caring for the elderly and rehabilitating the disabled; promoting education and nurturing youngsters; and raising the infants and guiding the children”, while continuously improving our services in response to the ever-changing needs of society. TWGHs started to provide free medical services to the sick and poor since its establishment. Nowadays, our services have expanded to medical, education and community services serving Hong Kong people from one generation to another.

The Hong Kong population is now facing a steadily ageing problem. In response to the growing demand for elderly services, TWGHs has provided various services to needy elders including community support and residential care services. On the other hand, a spectrum of services has been offered through rehabilitation centres, such as day training and rehabilitation services, so as to enhance integration of disabled people into the community. In addition, TWGHs has also provided various support and adopted the concept of medical community social integration to the youth to foster their all-round development.

We cordially solicit your support to our Medical Equipment Donation Scheme (for Community Services).

Your donation enables us to enhance the medical facilities and allows us to provide a more comprehensive medical care and attention for the elderly, disabled and youth.

All your donations will be used for purchasing the medical equipment. In appreciation of your generous donation, a plaque with your name engraved on it will be displayed on the equipment funded by you. Please refer to the attached brochure for more details.

**Please act now and lend your
helping hand to the deprived!**

◀ An Active Passive Trainer funded by donors to the Physiotherapy Unit of Jockey Club Rehabilitation Complex provides upper and lower limb training for people with physical disabilities to maintain their mobility of hands and legs, which helps about 1,000 man-times per year.
